

# FIVE MILLION GALLON TANK SITE AND DESIGN

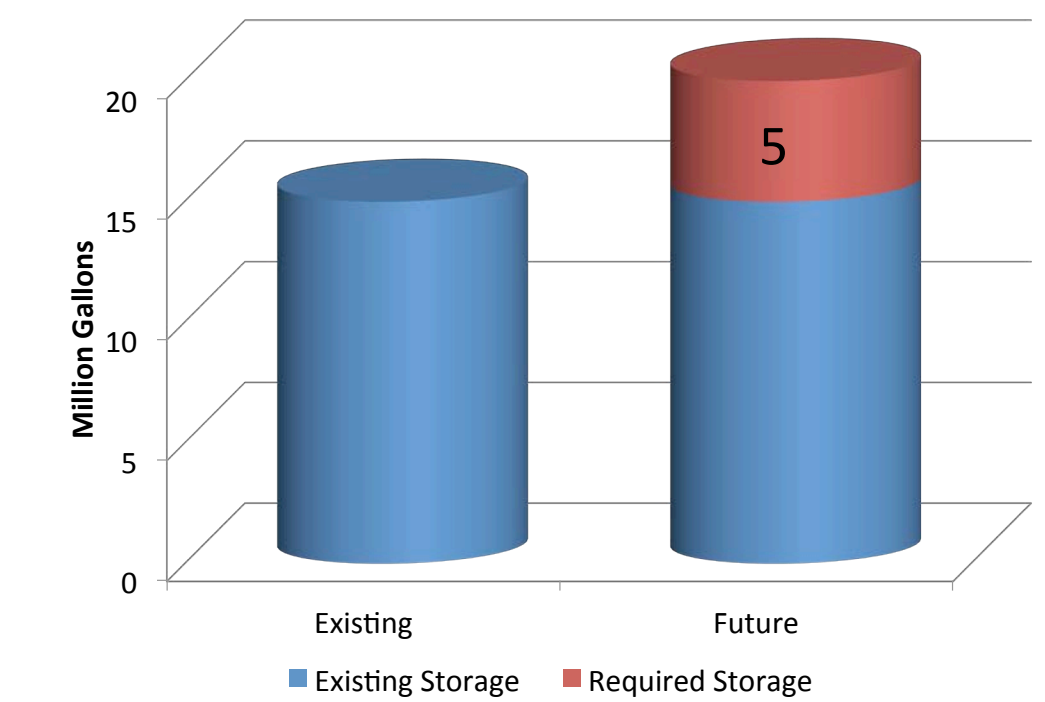

### Characteristics of the finished tank:

- Prestressed concrete structure
- Roof elevation matching that of existing Filtration Plant
- 24 feet tall
- 200 feet wide

## Tank Purpose

As a key component of the District's water system, the Five Million Gallon Tank will meet the projected need for additional water storage for:

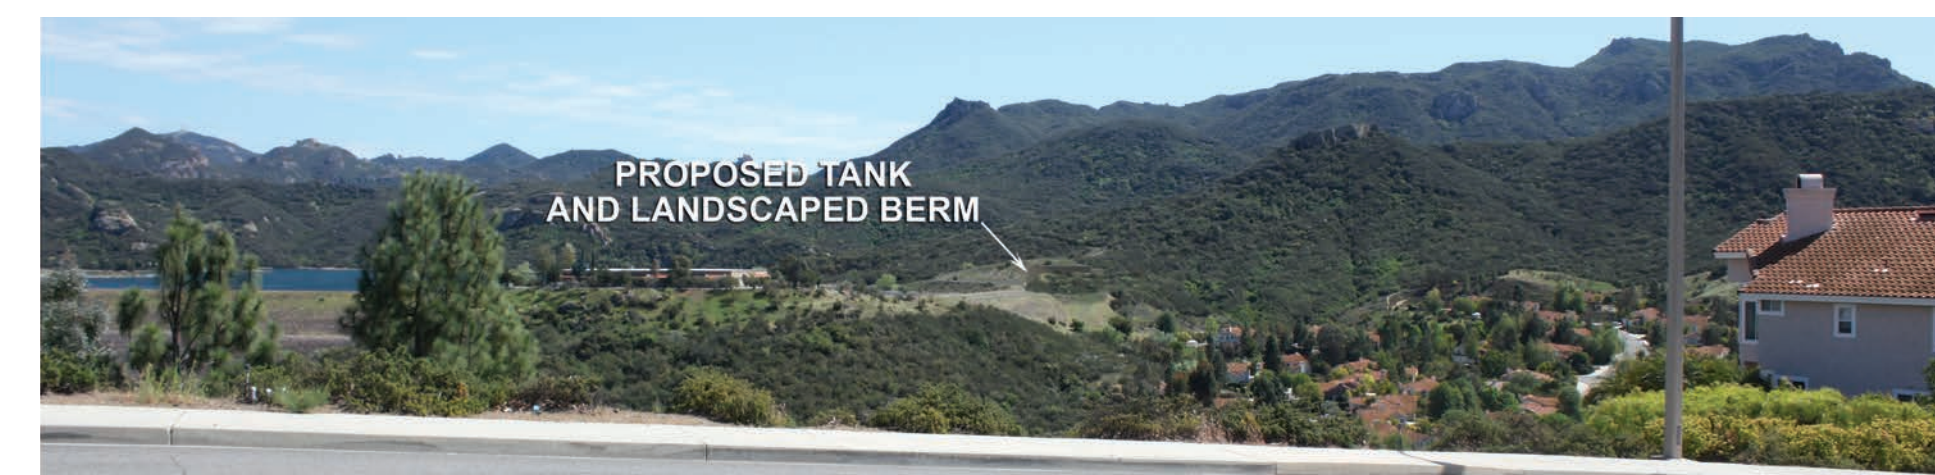

- Fire fighting capabilities per Los Angeles County Fire Department requirements
- Emergency supply in case of power outages, main breaks or similar events
- Projected future demands

*Storage needs are based on 2007 Potable Water Master Plan*
