

# WESTLAKE FILTRATION PLANT UPGRADES

April 2016

## THE PROJECT

The Westlake Filtration Plant adjacent to Las Virgenes Reservoir is being upgraded with additional filtration capacity and system modifications to ensure reliable supplies at the required flow rates.

### WHAT'S BEING DONE

This is a relatively small-scale project and most work will take place inside the Filtration Plant. There will be some occasional external work on the building and in the area of the storage tank.

### TIMEFRAME

Once the project is underway in April, work is expected to continue through February 2017. Normal work hours will be Monday through Friday from 7 a.m. to 4 p.m. Large deliveries will be scheduled between 8:30 a.m. to 2:30 p.m., with the exception of small concrete deliveries.

### WHAT TO EXPECT

There will be some additional vehicles accessing the reservoir site during the project; these will include construction workers and deliveries. There may be occasional construction noise when work must be performed outdoors. Workers will park at the reservoir site. Vehicles will not be stored on Torchwood or on Three Springs Dr.

### QUESTIONS OR CONCERNS?

Call the District during business hours at 818-251-2200. If a question arises nights or weekends, call the Construction Information Hotline at 818-251-2180 and leave a message. The District strives to respond to all messages within one business day.

Project progress will be posted on the District's website: [www.LVMWD.com](http://www.LVMWD.com), then select the "Construction Update" option on the home page.

Visit [www.LVMWD.com](http://www.LVMWD.com) for updates. Use the QR code with a smart phone device and go directly to the construction page.
